

MILKY WAY SPACE STATION 111

THE LIVING LIGHT

EPISODE 001

A damaged freighter. An impossible passenger. A signal pointing toward one of the largest stars in the galaxy.

AN MWSS111 FIRST-CONTACT MISSION

Emergency Signal

Docking Control - Bay Gamma

DOCKING CONTROL

Incoming freighter, this is Milky Way Space Station 111. Bay Gamma is cleared for emergency approach.

FREIGHTER PILOT

We struck an unknown object. Guidance is failing and our cargo section is burning. Request immediate landing!

Impact in Bay Gamma

Commander Ada takes control

COMMANDER ADA

Crash teams hold position. Dispatch emergency drones. Extinguish the fire, stabilize the freighter, and scan for survivors.

OPERATIONS OFFICER

Drones deployed. Fire suppression is active - but sensors are detecting an unknown energy source inside the wreckage.

The rescue drones enter the damaged bay as heat, smoke, and debris spread across the landing deck. Then the scanners detect something moving inside the fire.

First Contact

A living presence emerges

THE DISCOVERY

The fire bends inward instead of spreading. At its center, a radiant life-form rises from the wreckage - unharmed, aware, and watching the rescue team.

SCIENCE TEAM

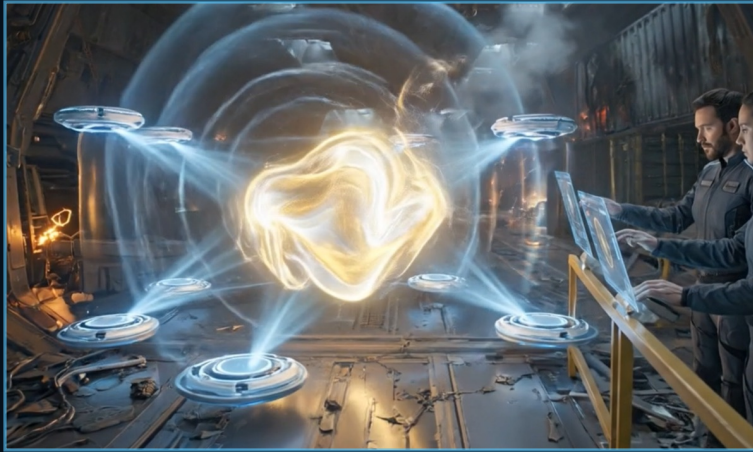

"It has no fixed biological structure. Its body is organized plasma - and the energy pattern is responding to us."

JIM

"This is not debris. This is a sentient being."

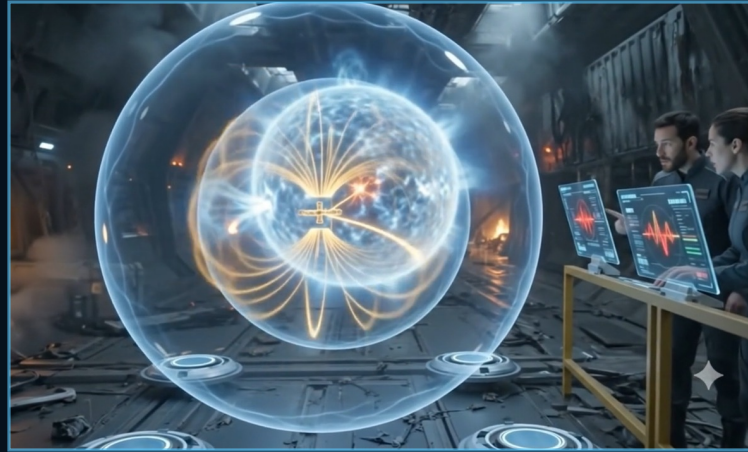

Temporary Containment

The message from UY Scuti

SCIENCE OFFICER

Containment stable. The drones are matching the entity's energy frequency.

JIM

It is communicating: a stellar signature. The destination is UY Scuti.

TECHNICIAN

The field is changing! It is converting its mass into coherent light!

The being shows the crew its origin - the immense red hypergiant UY Scuti. Its energy is fading, and it must return. Before the crew can respond, the entity becomes a stream of golden light, breaks containment, and escapes the station.

Vanguard Six Launches

Pursuit course: UY Scuti

CAPTAIN LORETTA A. SMITH

Open the launch-bay doors. Vanguard Six, initiate pursuit. We are not hunting this life-form - we are bringing it home.

ALTHEA

Course locked onto the entity's light trail. Destination trajectory corresponds with UY Scuti.

TO BE CONTINUED...

The pursuit of the Living Light has begun.
